

# Line Up and Punch Out!

**SLUG-SPLITTER** SC™

## With the new Greenlee Slug-Splitter SC™, the tool does the work...

Introducing the upgraded Greenlee Slug-Splitter SC™ Knockout. Punch through stainless steel in less time and with less potential for errors or alignment problems. What's changed with the new knockout? If you're interested in making sure your holes are perfectly centered, we've added a self-centering feature. This new feature greatly simplifies conduit hole and pilot device alignment. Just tighten down

the punch on your draw stud and let our new punch center itself on the pilot hole. No more trying to line up the die alignment marks in poor lighting conditions or drawing crosshairs on the box to ensure alignment. Greenlee has once again given you a tool designed to make your job easier.

## PRODUCT FEATURES

- **Save time and ensure accuracy!** Self-centering punch aligns itself on pilot hole.
- **No need to draw crosshairs** or line up die alignment marks.
- **Punch 16 gauge stainless steel** with a ratchet driver.
- Unique, patent pending punch profile also splits slugs for **easier slug removal**.
