*Meter Breaker Family*

## Residential Meter Breakers

Residential Meter Breakers

### Product Description

A meter breaker is service entrance equipment that consists of a single meter socket and loadcenter (circuit breaker distribution section) or meter socket and main breaker combined in one enclosure. Sometimes called Combos, All-In-Ones, Meter Centers or Meter Mains these units are increasing in popularity as the socket and load-center or main breaker are located in one location, thus providing the contractor with a labor and material savings when installing.

### Application Description

In addition to residential installations, meter breakers are equally applicable for rural service entrance, mobile homes, and construction site temporary power. Meter breakers are most often sold in the Western, Southwestern and Southeastern United States. The popularity of meter breakers is continuing to increase as more utilities deregulate and pass the responsibility of supplying watt-hour meter sockets on to the electrical contractor.

### Application Considerations

We have the meter breaker to meet your application. Cutler-Hammer offers:

- Non-EUSERC.
- EUSERC/West Coast (Electrical Utility Service Equipment Requirements Committee).
- House Panels.
- Commercial Safety Sockets.

#### Non-EUSERC

The Cutler-Hammer line of Non-EUSERC meter breakers is designed for customers served by utilities that are not members of EUSERC.

#### EUSERC/West Coast

The Cutler-Hammer line of EUSERC approved devices adheres to the agreed upon standards. EUSERC utilities are predominately located in the Western United States, but some Eastern and Midwestern utilities are also members. **These units can also be used in many Non-EUSERC areas.**

#### House Panels

Meter breaker device rated at 300 – 400A. Applied in EUSERC and Non-EUSERC areas.

#### Commercial Safety Sockets

Applied in EUSERC and Non-EUSERC service areas and used in commercial applications.

### Standards and Certifications

- UL Specification 414.
- UL File Number E52977.
- AEIC-EEI-NEMA Standards (MSJ-7).
- Meet EUSERC Utility requirements where noted.
- Documented Seismic Qualified — UBC and CBC Title 24.

### Product Specifications

- Ratings single-phase, 3-wire, 120/240V AC.
- 100 through 225 ampere main breaker and main lug types.
- 10,000 amperes rms symmetrical short circuit rating.

### Features, Benefits and Functions

- Both BR and CH type branch circuit breaker styles available.
- Meets latest NEC wire bending space requirements.
- Slotted sealing screws at hub with sealing provision provided.
- Surface units are supplied with mounting tabs.
- Semi-flush units are supplied with stucco flange.
- Meter socket ring landing will accept locking security rings.
- Overhead or underground service.
- Fifth jaw can be installed in the 3 o'clock or 9 o'clock position.
- Semi-flush with nail flange or surface mounting.
- Meter mounting and underground pull sections are utility sealable.
- Units are rated a minimum of 10,000 AIC; some units are 22,000 AIC.
- Numerous units supplied with center keyhole for ease of mounting.

① See Page 5 for box details.

② Provision for main is provided. WMB style devices accept Main Breaker style BR, 2-Pole.

③ Panels are specifically designed for the Georgia Power Service Territory, but may be used in any service territory that has the same design requirements.

④ When a provision for main is provided, order one of the main breakers listed in Table 2. All panels are dual labeled to accept Types BW or CSR Main Breakers.

⑤ MCBK225 lug kit is needed for load side cable connection for Meter Mains. Please order separately.

⑥ Single cover design.

⑦ Copper bus.

⑧ Units come with feed-through lugs.

⑨ One-piece cover on utility side Florida approved.

Ⓣ Per installed main breaker rating.

**Type CH Residential  
300 Ampere and 400 Ampere  
“House Panels”**

*Type CH Residential — 300 Ampere  
and 400 Ampere “House Panels”*

**Product Description**

A “House Panel” is a service entrance device that consists of a meter socket and a distribution section. The unit is rated at 300 amperes or 400 amperes.

**Application Description**

In addition to residential installations, a “house panel” could also be used for an apartment/condominium, clubhouse or common area. Verify local utility requirements before sale.

**Features, Benefits  
and Functions**

**300 Ampere and 400 Ampere  
“House Panels”**

- Underground feed only.
- “RH” type hub provisions on bottom endwall.
- Meets EUSERC requirements.
- Plug-on 400 ampere meter socket (320 ampere continuous).
- NEMA 3R — Rainproof.
- Lever bypass socket available on certain catalog numbers.
- Service entrance equipment and UL listed.
- Uses CH branch breakers.

**Product Selection**

### Type BR Residential 300 Ampere and 400 Ampere "House Panels"

Type BR Residential — 300 Ampere and 400 Ampere "House Panels"

#### Product Description

A "House Panel" is a service entrance device that consists of a meter socket and a distribution section. The unit is rated at 300 amperes or 400 amperes.

#### Application Description

In addition to residential installations, a "house panel" could also be used for an apartment/condominium, club-house or common area. Verify local utility requirements before sale.

#### Features, Benefits and Functions

##### 300 Ampere and 400 Ampere "House Panels"

- Underground feed only.
- "RH" type hub provisions on bottom endwall.
- Meets EUSERC requirements.
- Plug-on 400 ampere meter socket (320 ampere continuous).
- NEMA 3R — Rainproof.
- Lever bypass socket available on certain catalog numbers.
- Service entrance equipment and UL listed.
- Uses BR branch breakers.

*Meter Breaker Family*

**Residential Meter Breakers**

*Residential Meter Breakers*

**Product Description**

A meter breaker is service entrance equipment that consists of a single meter socket and loadcenter (circuit breaker distribution section) or meter socket and main breaker combined in one enclosure. Sometimes called Combos, All-In-Ones, Meter Centers or Meter Mains these units are increasing in popularity as the socket and load-center or main breaker are located in one location, thus providing the contractor with a labor and material savings when installing.

**Application Description**

In addition to residential installations, meter breakers are equally applicable for rural service entrance, mobile homes, and construction site temporary power. Meter breakers are most often sold in the Western, Southwestern and Southeastern United States. The popularity of meter breakers is continuing to increase as more utilities deregulate and pass the responsibility of supplying watt-hour meter sockets on to the electrical contractor.

**Application Considerations**

We have the meter breaker to meet your application. Cutler-Hammer offers:

- Non-EUSERC.
- EUSERC/West Coast (Electrical Utility Service Equipment Requirements Committee).
- House Panels.
- Commercial Safety Sockets.

**Non-EUSERC**

The Cutler-Hammer line of Non-EUSERC meter breakers is designed for customers served by utilities that are not members of EUSERC.

**EUSERC/West Coast**

The Cutler-Hammer line of EUSERC approved devices adheres to the agreed upon standards. EUSERC utilities are predominately located in the Western United States, but some Eastern and Midwestern utilities are also members. **These units can also be used in many Non-EUSERC areas.**

**House Panels**

Meter breaker device rated at 300 – 400A. Applied in EUSERC and Non-EUSERC areas.

**Commercial Safety Sockets**

Applied in EUSERC and Non-EUSERC service areas and used in commercial applications.

**Standards and Certifications**

- UL Specification 414.
- UL File Number E52977.
- AEIC-EEI-NEMA Standards (MSJ-7).
- Meet EUSERC Utility requirements where noted.
- Documented Seismic Qualified — UBC and CBC Title 24.

**Product Specifications**

- Ratings single-phase, 3-wire, 120/240V AC.
- 100 through 225 ampere main breaker and main lug types.
- 10,000 amperes rms symmetrical short circuit rating.

**Features, Benefits and Functions**

- Both BR and CH type branch circuit breaker styles available.
- Meets latest NEC wire bending space requirements.
- Slotted sealing screws at hub with sealing provision provided.
- Surface units are supplied with mounting tabs.
- Semi-flush units are supplied with stucco flange.
- Meter socket ring landing will accept locking security rings.
- Overhead or underground service.
- Fifth jaw can be installed in the 3 o'clock or 9 o'clock position.
- Semi-flush with nail flange or surface mounting.
- Meter mounting and underground pull sections are utility sealable.
- Units are rated a minimum of 10,000 AIC; some units are 22,000 AIC.
- Numerous units supplied with center keyhole for ease of mounting.

① See Page 5 for box details.

② Provision for main is provided. WMB style devices accept Main Breaker style BR, 2-Pole.

③ Panels are specifically designed for the Georgia Power Service Territory, but may be used in any service territory that has the same design requirements.

④ When a provision for main is provided, order one of the main breakers listed in Table 2. All panels are dual labeled to accept Types BW or CSR Main Breakers.

⑤ MCBK225 lug kit is needed for load side cable connection for Meter Mains. Please order separately.

⑥ Single cover design.

⑦ Copper bus.

⑧ Units come with feed-through lugs.

⑨ One-piece cover on utility side Florida approved.

Ⓣ Per installed main breaker rating.

- ① See Page 5 for box details.
- ② Interrupting rating is dependent on the main breaker that is installed.
- ③ Semi flush flange, not full stucco flange
- ④ Units come with feed-through lugs.
- ⑤ Unit has copper bus.
- ⑥ When a provision for main is provided, order one of the main breakers listed in Table 4. All panels are dual labeled to accept Types BW or CSR Main Breakers.
- ⑦ Use WMB70SMK if second main kit is needed.

**Type CH Residential  
300 Ampere and 400 Ampere  
“House Panels”**

*Type CH Residential — 300 Ampere  
and 400 Ampere “House Panels”*

**Product Description**

A “House Panel” is a service entrance device that consists of a meter socket and a distribution section. The unit is rated at 300 amperes or 400 amperes.

**Application Description**

In addition to residential installations, a “house panel” could also be used for an apartment/condominium, clubhouse or common area. Verify local utility requirements before sale.

**Features, Benefits  
and Functions**

**300 Ampere and 400 Ampere  
“House Panels”**

- Underground feed only.
- “RH” type hub provisions on bottom endwall.
- Meets EUSERC requirements.
- Plug-on 400 ampere meter socket (320 ampere continuous).
- NEMA 3R — Rainproof.
- Lever bypass socket available on certain catalog numbers.
- Service entrance equipment and UL listed.
- Uses CH branch breakers.

**Product Selection**

① Confirm security type for individual EUSERC utility requirements.

② Semi Flush Flange kit — HPPR.

③ If manual bypass is needed, order bypass kit HPBPK.

④ Feed-through lugs included.

### Type BR Residential 300 Ampere and 400 Ampere "House Panels"

Type BR Residential — 300 Ampere and 400 Ampere "House Panels"

#### Product Description

A "House Panel" is a service entrance device that consists of a meter socket and a distribution section. The unit is rated at 300 amperes or 400 amperes.

#### Application Description

In addition to residential installations, a "house panel" could also be used for an apartment/condominium, club-house or common area. Verify local utility requirements before sale.

#### Features, Benefits and Functions

##### 300 Ampere and 400 Ampere "House Panels"

- Underground feed only.
- "RH" type hub provisions on bottom endwall.
- Meets EUSERC requirements.
- Plug-on 400 ampere meter socket (320 ampere continuous).
- NEMA 3R — Rainproof.
- Lever bypass socket available on certain catalog numbers.
- Service entrance equipment and UL listed.
- Uses BR branch breakers.

① Confirm security type for individual EUSERC utility requirements.

② If unit needs to be semi-flush, order accessory item catalog number HPPR to convert all surface mounting devices to semi-flush mounting.

③ Feed-through lugs.

④ Bolt-on meter socket.

⑤ Secondary sub-main installed in panel.
