Arrow Hart delivers superior performance in the harshest environments

Table of contents	Page
NEMA and Non-NEMA quick reference chart	2-5
Complex environment introduction	6-7
Watertight devices & accessories	8-16
Severe duty devices	17-21
Corrosion resistant devices	22-25
Specification & performance data	26-31

Complex Environments

Eaton's family of Arrow Hart complex environment devices excel where standard wiring devices are most susceptible to failure: physically abusive areas containing a host of contaminants that attack device integrity like oil, chemicals, water and moisture, UV exposure, ozone and corrosive airborne contaminants.

Arrow Hart offers a complete range of solutions for use in complex environments

- Watertight devices provide safe and reliable connectivity in the harshest indoor and outdoor environments, including wet locations, high-pressure spray, UV and ozone exposure, and prolonged contact with chemicals and oils
- Severe duty devices offer superior resistance to UV exposure, ozone and physical abuse typically found in industrial applications
- Corrosion resistant devices are engineered to perform where chemical vapors, moisture and humidity create corrosive environments

Watertight, severe duty & corrosion resistant devices

Select from a complete offering of straight blade and locking devices intended for use in complex and harsh environments, including a wide range of plugs, connectors, receptacles and accessories.

Watertight device applications:

- Food & beverage processing
- Chemical production
- Marinas/shipbuilding
- Agriculture
- Water/wastewater treatment
- Industrial manufacturing

Severe duty device applications:

- Industrial manufacturing
- Mining
- Agriculture
- Warehousing & refrigeration

Corrosion resistant device applications:

- Chemical processing
- Temporary power
- Machine shops/millworks

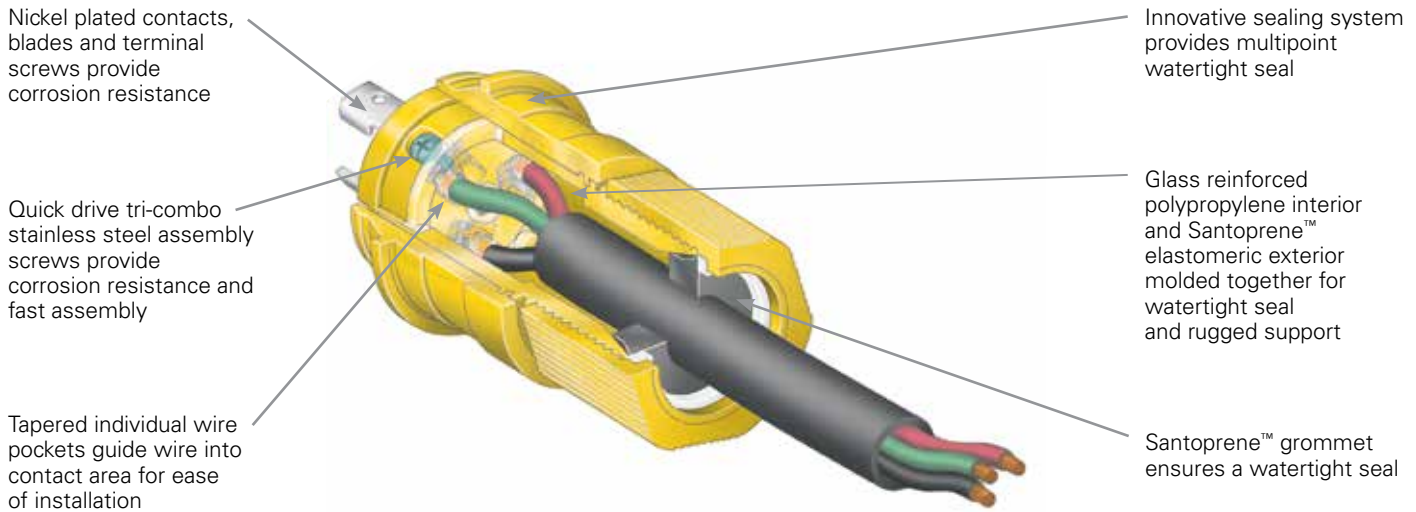

Watertight

A wide range of watertight devices

Watertight devices have been designed for industrial applications in which electrical connections are exposed to liquid splashing and hose-down. Ideal for industrial manufacturing, food and beverage processing, agriculture applications, chemical production, shipyards and marinas plus wastewater treatment facilities, watertight devices have excellent resistance to physical abuse, hose-directed water, oils, chemicals, corrosive liquids, airborne particulates and contaminants, UV exposure and ozone attack. Properly mated plugs, connectors, receptacles and closed receptacles form a multi-point watertight seal that resists 1,000 psi water spray.

Watertight plugs & connectors features & benefits

Compliances, specifications and availability are subject to change without notice.

Watertight

Innovative solutions for watertight applications

Eaton's Arrow Hart watertight locking devices utilize a unique, robust design and superior materials to provide watertight security in harsh environments

Watertight receptacles & accessories features & benefits

Spring-loaded self-closing flip lid cover ensures a watertight seal to NEMA Type 4X when the receptacle is not in use

Glass-filled nylon cover and exterior shell provide impact resistance in harsh environments

Stainless steel mounting and assembly screws provide corrosion resistance

Lockable cover provides means of lockout/tagout

Nickel plated power contacts and terminal assemblies provide corrosion resistance

Unique design and sealing system provides multipoint IP67 watertight seal

Spring-loaded, self closing glass filled flip lids ensure a watertight seal to NEMA Type 4X when closed

Tri-combo stainless steel assembly screws provide corrosion resistance

Optional plug closure cap provides watertight protection for plug when not in use

Replace threaded cord grip with optional wire mesh fitting for integrated cable strain relief

Santoprene™ grommets ensure watertight seal at cord entrance for the widest range of cord diameters

Compliances, specifications and availability are subject to change without notice.

Arrow Hart

Choose from an extensive line of rugged industrial devices

Severe duty devices

Where typical devices fail, Arrow Hart's industrial severe duty devices exceed expectations. Select from a complete line of locking or straight blade plugs and connectors for your industrial applications.

Applications

Severe duty devices have been designed specifically for industrial applications where electrical connections are exposed to dust, dirt, corrosive elements and physical abuse. Ideal for industrial manufacturing, agriculture applications, construction, warehousing and chemical processing environments, severe duty devices have excellent resistance to physical abuse, metal chips, foreign particulates, corrosion, airborne contaminants, UV exposure and ozone attack. Our Santoprene™ thermoplastic elastomer devices easily outperform rubber construction plugs and connectors under any conditions.

Severe duty

Severe duty devices in complex industrial environments

Superior materials and design provide excellent insulation and durability properties in complex industrial environments.

Severe duty plugs & connectors features & benefits

Santoprene™ elastomeric exterior provides superior performance in complex environments

Dual range cord grip provides positive cord gripping while limiting strain on conductors

Connector

Nickel plated blades, contacts and terminal screws provide corrosion resistance

Rugged nylon interior protects and insulates terminals

Wiring chamber provides generous space for wiring

Exterior jacket seals cord entrance

Plug

Combination of rugged nylon interior body and elastomeric exterior makes severe duty devices ideal for use in harsh environments

Tri-combo stainless steel assembly screws provide corrosion resistance

Cord grip accommodates wide range of cables and provides strain relief

Multiple-head drive screws provide versatility for ease of use

Unique exterior jacket seals cord entrance to protect from contaminants

Compliances, specifications and availability are subject to change without notice.

Arrow Hart

Designed specifically for longevity in harsh, corrosive environments

Corrosion resistant devices

The right device for moist and humid applications. Select from a wide range of truly unique locking and straight blade plugs, connectors and receptacles designed for use in corrosive environments.

Applications

Corrosion resistant devices have been designed specifically for environments where moisture and humidity create problems for electrical connections. Ideal for industrial manufacturing, food processing, agriculture applications, and chemical processing environments, corrosion resistant devices have excellent resistance to corrosive elements plus airborne particulates and contaminants, providing dependable performance where typical devices fail. Nickel plated power contacts, terminals, blades and straps deliver enhanced corrosion resistance with excellent electrical performance.

Corrosion resistant

Innovative solutions for corrosive environment applications

Select for industrial or commercial applications, corrosion resistant devices are engineered to deliver long, dependable performance in moisture, humidity, and airborne contaminant-laden corrosive environments.

Corrosion resistant receptacles features & benefits

Solid, 1-piece, nickel plated brass grounding system assures ground integrity

High impact, arc and moisture resistant nylon construction

Exclusive 5-leaf nickel plated, solid brass blade contacts provide consistent performance and superior plug retention

Screw terminal guards provide insulation from conductive surfaces (straight blade receptacles only)

Corrosion resistant plugs & connectors features & benefits

Rugged nylon construction for extreme environments

NEMA configuration prominently displayed on exterior providing simplified identification

Exterior molds to hand with scalloped design for extra grip

Captive tri-combo screws (Slotted, Phillips and Robertson) for easy installation

Nickel plated blades, contacts and terminals

Compliances, specifications and availability are subject to change without notice.

Arrow Hart delivers superior performance in the harshest environments

Table of contents	Page
NEMA and Non-NEMA quick reference chart	2-5
Complex environment introduction	6-7
Watertight devices & accessories	8-16
Severe duty devices	17-21
Corrosion resistant devices	22-25
Specification & performance data	26-31

Complex Environments

Eaton's family of Arrow Hart complex environment devices excel where standard wiring devices are most susceptible to failure: physically abusive areas containing a host of contaminants that attack device integrity like oil, chemicals, water and moisture, UV exposure, ozone and corrosive airborne contaminants.

Arrow Hart offers a complete range of solutions for use in complex environments

- Watertight devices provide safe and reliable connectivity in the harshest indoor and outdoor environments, including wet locations, high-pressure spray, UV and ozone exposure, and prolonged contact with chemicals and oils
- Severe duty devices offer superior resistance to UV exposure, ozone and physical abuse typically found in industrial applications
- Corrosion resistant devices are engineered to perform where chemical vapors, moisture and humidity create corrosive environments

Watertight, severe duty & corrosion resistant devices

Select from a complete offering of straight blade and locking devices intended for use in complex and harsh environments, including a wide range of plugs, connectors, receptacles and accessories.

Watertight device applications:

- Food & beverage processing
- Chemical production
- Marinas/shipbuilding
- Agriculture
- Water/wastewater treatment
- Industrial manufacturing

Severe duty device applications:

- Industrial manufacturing
- Mining
- Agriculture
- Warehousing & refrigeration

Corrosion resistant device applications:

- Chemical processing
- Temporary power
- Machine shops/millworks

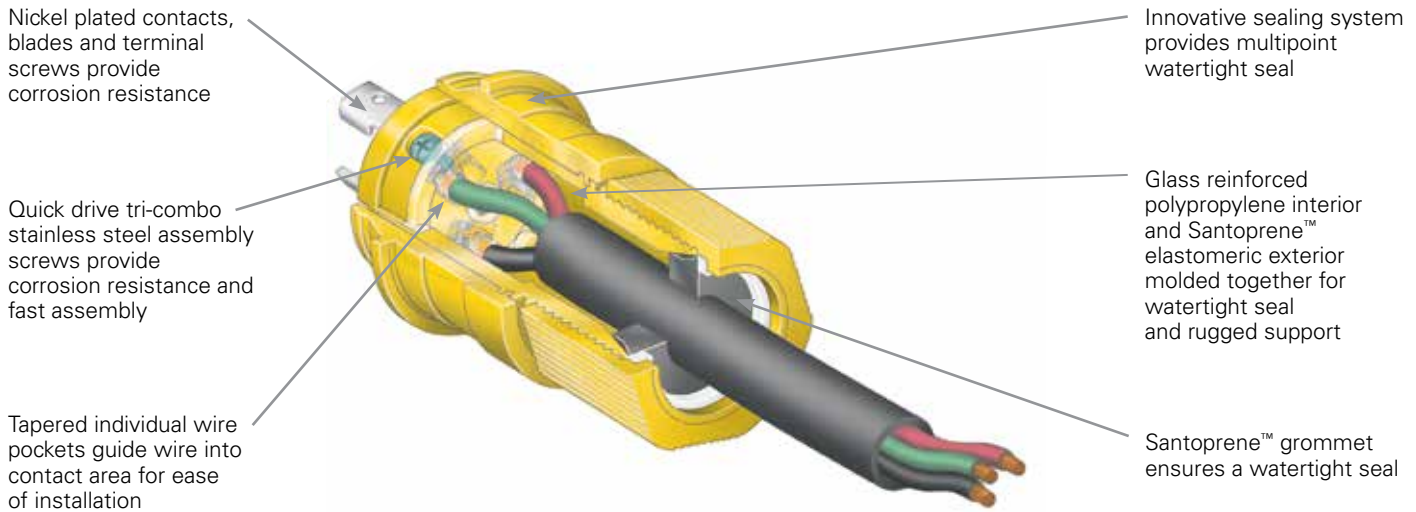

Watertight

A wide range of watertight devices

Watertight devices have been designed for industrial applications in which electrical connections are exposed to liquid splashing and hose-down. Ideal for industrial manufacturing, food and beverage processing, agriculture applications, chemical production, shipyards and marinas plus wastewater treatment facilities, watertight devices have excellent resistance to physical abuse, hose-directed water, oils, chemicals, corrosive liquids, airborne particulates and contaminants, UV exposure and ozone attack. Properly mated plugs, connectors, receptacles and closed receptacles form a multi-point watertight seal that resists 1,000 psi water spray.

Watertight plugs & connectors features & benefits

Compliances, specifications and availability are subject to change without notice.

Watertight

Innovative solutions for watertight applications

Eaton's Arrow Hart watertight locking devices utilize a unique, robust design and superior materials to provide watertight security in harsh environments

Watertight receptacles & accessories features & benefits

Unique design and sealing system provides multipoint IP67 watertight seal

Spring-loaded, self closing glass filled flip lids ensure a watertight seal to NEMA Type 4X when closed

Tri-combo stainless steel assembly screws provide corrosion resistance

Optional plug closure cap provides watertight protection for plug when not in use

Replace threaded cord grip with optional wire mesh fitting for integrated cable strain relief

Santoprene™ grommets ensure watertight seal at cord entrance for the widest range of cord diameters

Compliances, specifications and availability are subject to change without notice.

Arrow Hart

Choose from an extensive line of rugged industrial devices

Severe duty devices

Where typical devices fail, Arrow Hart's industrial severe duty devices exceed expectations. Select from a complete line of locking or straight blade plugs and connectors for your industrial applications.

Applications

Severe duty devices have been designed specifically for industrial applications where electrical connections are exposed to dust, dirt, corrosive elements and physical abuse. Ideal for industrial manufacturing, agriculture applications, construction, warehousing and chemical processing environments, severe duty devices have excellent resistance to physical abuse, metal chips, foreign particulates, corrosion, airborne contaminants, UV exposure and ozone attack. Our Santoprene™ thermoplastic elastomer devices easily outperform rubber construction plugs and connectors under any conditions.

Severe duty

Severe duty devices in complex industrial environments

Superior materials and design provide excellent insulation and durability properties in complex industrial environments.

Severe duty plugs & connectors features & benefits

Santoprene™ elastomeric exterior provides superior performance in complex environments

Dual range cord grip provides positive cord gripping while limiting strain on conductors

Connector

Nickel plated blades, contacts and terminal screws provide corrosion resistance

Rugged nylon interior protects and insulates terminals

Wiring chamber provides generous space for wiring

Exterior jacket seals cord entrance

Plug

Combination of rugged nylon interior body and elastomeric exterior makes severe duty devices ideal for use in harsh environments

Tri-combo stainless steel assembly screws provide corrosion resistance

Cord grip accommodates wide range of cables and provides strain relief

Multiple-head drive screws provide versatility for ease of use

Unique exterior jacket seals cord entrance to protect from contaminants

Compliances, specifications and availability are subject to change without notice.

Arrow Hart

Designed specifically for longevity in harsh, corrosive environments

Corrosion resistant devices

The right device for moist and humid applications. Select from a wide range of truly unique locking and straight blade plugs, connectors and receptacles designed for use in corrosive environments.

Applications

Corrosion resistant devices have been designed specifically for environments where moisture and humidity create problems for electrical connections. Ideal for industrial manufacturing, food processing, agriculture applications, and chemical processing environments, corrosion resistant devices have excellent resistance to corrosive elements plus airborne particulates and contaminants, providing dependable performance where typical devices fail. Nickel plated power contacts, terminals, blades and straps deliver enhanced corrosion resistance with excellent electrical performance.

Corrosion resistant

Innovative solutions for corrosive environment applications

Select for industrial or commercial applications, corrosion resistant devices are engineered to deliver long, dependable performance in moisture, humidity, and airborne contaminant-laden corrosive environments.

Corrosion resistant receptacles features & benefits

Solid, 1-piece, nickel plated brass grounding system assures ground integrity

High impact, arc and moisture resistant nylon construction

Exclusive 5-leaf nickel plated, solid brass blade contacts provide consistent performance and superior plug retention

Screw terminal guards provide insulation from conductive surfaces (straight blade receptacles only)

Corrosion resistant plugs & connectors features & benefits

Rugged nylon construction for extreme environments

NEMA configuration prominently displayed on exterior providing simplified identification

Exterior molds to hand with scalloped design for extra grip

Captive tri-combo screws (Slotted, Phillips and Robertson) for easy installation

Nickel plated blades, contacts and terminals

Compliances, specifications and availability are subject to change without notice.

Watertight locking devices specification & performance data

Watertight locking devices

Product description

2-pole, 3-wire grounding; 3-pole, 3-wire non-grounding; 3-pole, 4-wire grounding; 4-pole, 4-wire non-grounding; 4-pole, 5-wire grounding

Device type	Watertight receptacles, 15A locking configurations: L5-15, L6-15, L7-15	Watertight receptacles, 20A & 30A locking configurations: L7-20, L8-20, L7-30, L8-30, L10-20, L16-20, L16-30, L17-30, L19-20, L20-20, L19-30, L20-30, L23-20, L22-30, L23-30, Non-NEMA 20A, Non-NEMA 30A	Watertight receptacles, 20A & 30A locking configurations: L5-20, L6-20, L5-30, L6-30, L11-20, L10-30, L11-30, L15-20, L14-30, L15-30, L18-20, L18-30, L21-20, L22-20, L21-30
Wiring type	Back wire	Back wire	Back wire
Testing & code compliance	<ul style="list-style-type: none"> cULus Listed to UL498, file no. E2369 	<ul style="list-style-type: none"> cULus Listed to UL498, file no. E2369 	<ul style="list-style-type: none"> cULus Listed to UL498, file no. E2369 NOM certified
Environmental specifications	<p>Flammability: Meets UL94 requirements; V2 rated</p> <p>Temperature rating: -40°C to 75°C (-40°F to 167°F)</p> <p>Protection: NEMA Type 3, 3R, 4, 4X, 12 & IP66</p> <p>High pressure water test: 1000 psi spray (mated or closed)</p>	<p>Flammability: Meets UL94 requirements; V2 rated</p> <p>Temperature rating: -40°C to 75°C (-40°F to 167°F)</p> <p>Protection: NEMA Type 3, 3R, 4, 4X, 12 & IP66</p> <p>High pressure water test: 1000 psi spray (mated or closed)</p>	<p>Flammability: Meets UL94 requirements; V2 rated</p> <p>Temperature rating: -40°C to 75°C (-40°F to 167°F)</p> <p>Protection: NEMA Type 3, 3R, 4, 4X, 12 & IP66</p> <p>High pressure water test: 1000 psi spray (mated or closed)</p>
