

# Low Voltage Mounting Brackets

For Low Voltage Class 2 wiring in *EXISTING CONSTRUCTION*

**Recessed Screw Hole**  
Seats wall plate flush with wall surface

**Thin Front Lip**  
Seats better on drywall –  
Keeps wall plate flush to wall

**Oval Hole**  
Allows lining-up and final  
straightening or shifting of device

**Wing Design**  
provides secure mounting of  
bracket – flips up as this screw  
is tightened

LV1  
Single-gang

LV2  
2-gang

LV2 for the  
installation of  
fire alarms in  
existing construction

Arlington's non-metallic, Low Voltage Mounting Brackets are the time and money-saving solution for faster and easier mounting of Class 2 communications, computer and cable TV wiring.

Designed to mount wall plates flush, LV1 and LV2 mounting brackets offer features – specially designed screw holes and more (shown left) – that deliver a better-looking, easy to install job.

- Adjusts to fit 1/4" to 1" thick wall board, paneling or drywall
- Bracket is its own template for cut out
- Horizontal or vertical mounting
- UL, CSA Listed

| Catalog Number            | UPC/DEI/NAED Mfg. #018997 | Description | Unit Pkg | Std Pkg |
|---------------------------|---------------------------|-------------|----------|---------|
| LV1                       | 58175                     | Single gang | 10       | 100     |
| LV2                       | 10952                     | 2-gang      | 5        | 50      |
| for Existing Construction |                           |             |          |         |

*Installs faster than metal – costs less too!*
