Descriptions

Description	OCC SENSOR,PIR,120V 500W,IV
extra long description	HWDK WS1000I OCC SENSOR,PIR,120V 50
Features	Standard Passive Infrared Technology requires a clear, unobstructed line of sight for detection, because it senses occupancy as movement of heat emitted from the body against the background space. A segmented Fresnel lens divides a coverage area into zones. Movement across zones is interpreted as occupancy. Excellent for small room control.
